DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of **50 to 150 words**. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The disclosure is objected to because of the following informalities: applicant must provide serial numbers and filing dates of related cases. All references to attorney docket numbers must be deleted.

On page 22, line 7, "trip arm 202" should be corrected as "trip arm 102."

Appropriate correction is required.

Art Unit: 2832

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 2, applicant should clarify what is intended by the housing “at least partially housing a *reset lockout mechanism*.” It is not clear whether the button 30 is actually intended to be part of the lockout mechanism or to be locked out by it. In lines 3-4, applicant should clarify the lockout pathway having a plurality of paths. In lines 4-5, applicant should clarify the relationship and interaction between the lockout member and reset mechanism.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1, as best able to be understood in view of the rejections under 35 U.S.C. 112, second paragraph, is rejected under 35 U.S.C. 102(b) as being anticipated by Virani et al. [US 4,034,266].

Virani et al. discloses a circuit interrupting device [11] comprising:

- a housing [65] at least partially housing a reset lockout mechanism [figures 6-7];

Art Unit: 2832

- line and load conductors [figure 10];
- a reset lockout mechanism [figures 6-7] having a lockout member [139, 89] and lockout pathway having a plurality of paths such that the lockout member travels in one pathway after a trip and in another pathway if a predetermined condition enables the device to reset a connection [column 6, lines 19-54].
